SUMMARY

Full Stack Developer with hands-on experience building production-ready web applications using Python, Django, Django REST Framework, React, and PostgreSQL. Developed secure REST APIs, authentication systems, and AI-powered applications. Passionate about backend engineering and scalable web development.

SKILLS

Programming Languages Python, JavaScript

Frontend HTML5, CSS3, Tailwind CSS, Javascript, React.js

Backend Django, Django Rest Framework, REST API Development, Node.js, Express.js

Web and ApiConcepts RESTful APIs, Token Authentication, JSON, API Testing, HTTP Methods

Developer Tools Git, GitHub, VS Code, Postman

Databases PostgreSQL, SQLite

Deployment & Cloud Render, Netlify, Vercel

PROJECTS

Job Portal Web Application | Django + React [Link](#) Feb '26

- Developed a full-stack recruitment platform enabling user registration, job discovery, resume-based applications, and job bookmarking.
- Designed and integrated RESTful APIs using Django REST Framework to connect React frontend components with backend services.
- Implemented authentication, role-based access, and application management workflows for secure user interactions.
- Structured relational database models for jobs, applications, and user activity tracking.
- Deployed frontend and backend applications on cloud platforms and managed production configurations.

AI Study Helper - Full Stack AI Web App [Link](#) Nov '25

- Tech Stack: JavaScript, Node.js, Express.js, REST API, HTML5, CSS3, Google Gemini API
- Built an AI-powered learning platform that generates simplified explanations, summaries, and study notes from user queries.
- Integrated Google Gemini API for real-time AI-generated educational content.
- Implemented RESTful APIs using Node.js and Express.
- Deployed frontend on Netlify and backend on Render.

Django Authentication API [Link](#) Jan '26

- Tech Stack: Python, Django, Django REST Framework, SQLite, Postman, Git & GitHub | [GitHub](#)
- Developed a secure RESTful Authentication API using Django REST Framework
- Implemented user registration, login, profile, password change, and password reset via email
- Used token-based authentication to protect user endpoints and ensure secure access
- Tested all API endpoints using Postman and documented them with a Postman collection
- Managed environment variables and dependencies using .env and requirements.txt

EXPERIENCE

Web Developer intern Jun '25 — Jul '25

Project based training(Remote) Remote

- Designed and deployed 4+ responsive web pages, improving load performance and usability. Utilized Git and GitHub for version control and team collaboration, ensuring seamless project workflow. Worked on small hands-on tasks focused on UI structure and responsiveness.
